## More February News at ASCARC

- Once again, our friends from **Pass It Along** (right) provided volunteer help for our **Valentine's Day virtual dance and party**. William and Abigail, both senior students at **Sussex Tech** and Pass It Along volunteers, created 25 center pieces for each group home to enjoy for the annual V-Day dance and party.

- **SCARC's virtual day habilitation program** has often ventured into the ART world to promote the development of art and painting skills. Several of our group home residents and those at home participated in painting, as is shown with **Spencer** (left) and his art painting. Also, **Krista, Nina, and Sean** from our **Sussex** group home join in.

- Preparing for our **Valentine's Day virtual dance and party** is a fun focus when making dessert for the whole group home. **Michelle** (l) prepares a cake mix with **staff Corey** to add to the enjoyment of the Valentine's Party which is the first virtual party of the Valentine season. The cake looks yummy guys! More photos of the party appear here:

- Love is in the air at our **Val Court group home (l)** as the **lovely ladies** get ready for our virtual Valentine's Day party and dance. Decorations and high spirits reign supreme! On the right, the **men from our Clearview group home** are ready to party for our annual Valentine's Day party and dance. The music is provided by **DJ Fred Decker** located at the

Lecher Center in Augusta, and each group home is connected via zoom to enjoy the party.

- This week in Virtual Day Hab, the participants took part in a presentation on **historic bugs and worked on digging up bug fossils**. The bug fossil kits were part of the supplies provided to the participants by SCARC, and are produced by National Geographic. Melissa participates in the activity from her home where she successfully discovers the bug in the mud.
